- **Languages:** JavaScript, TypeScript, HTML, CSS, Lua
- **Frontend:** React, Next.js, Angular
- **Backend:** NodeJS, NestJS
- **Tools:** Git, GitHub, Docker, Jira, Kayako Help Desk, SVN, Unreal Editor

Work Experience

Team projects (2023 - 2026)

- [Swagger/OpenAPI UI Application](#): Developed a full-stack React application for API documentation and testing.
- [REST Client](#): Built a lightweight, feature-rich Postman alternative with robust authentication support.
- [eCommerce Application](#): Collaborated on a full-stack platform replicating real-world shopping experiences.
- [GraphiQL-App](#): Created a secure, authorized playground/IDE for GraphQL requests.

Game/Level Designer @ [Vostok Games](#) (2019 - 2022)

- Prototyped single-player FPS levels, mission documentation, and scripted missions for unannounced titles.
- Utilized Unreal Editor, Blueprints, and Git within an Agile environment.

Technical Support Engineer @ [Vostok Games](#) (2014 - 2019)

- Resolved complex customer technical issues using Kayako Help Desk and Jira.
- Architected and managed a [comprehensive FAQ resource](#) to improve user self-service.
- Authored internal technical documentation, improving team troubleshooting efficiency.

Customer Support, QA @ [GSC Game World](#) (2005 - 2013)

- Provided multi-channel technical support for S.T.A.L.K.E.R. and Cossacks series.
- Executed rigorous QA testing and bug reproduction, collaborating directly with the development team via SVN.
- Gained hands-on experience in level design and scripting using Lua and the X-Ray Level Editor.
